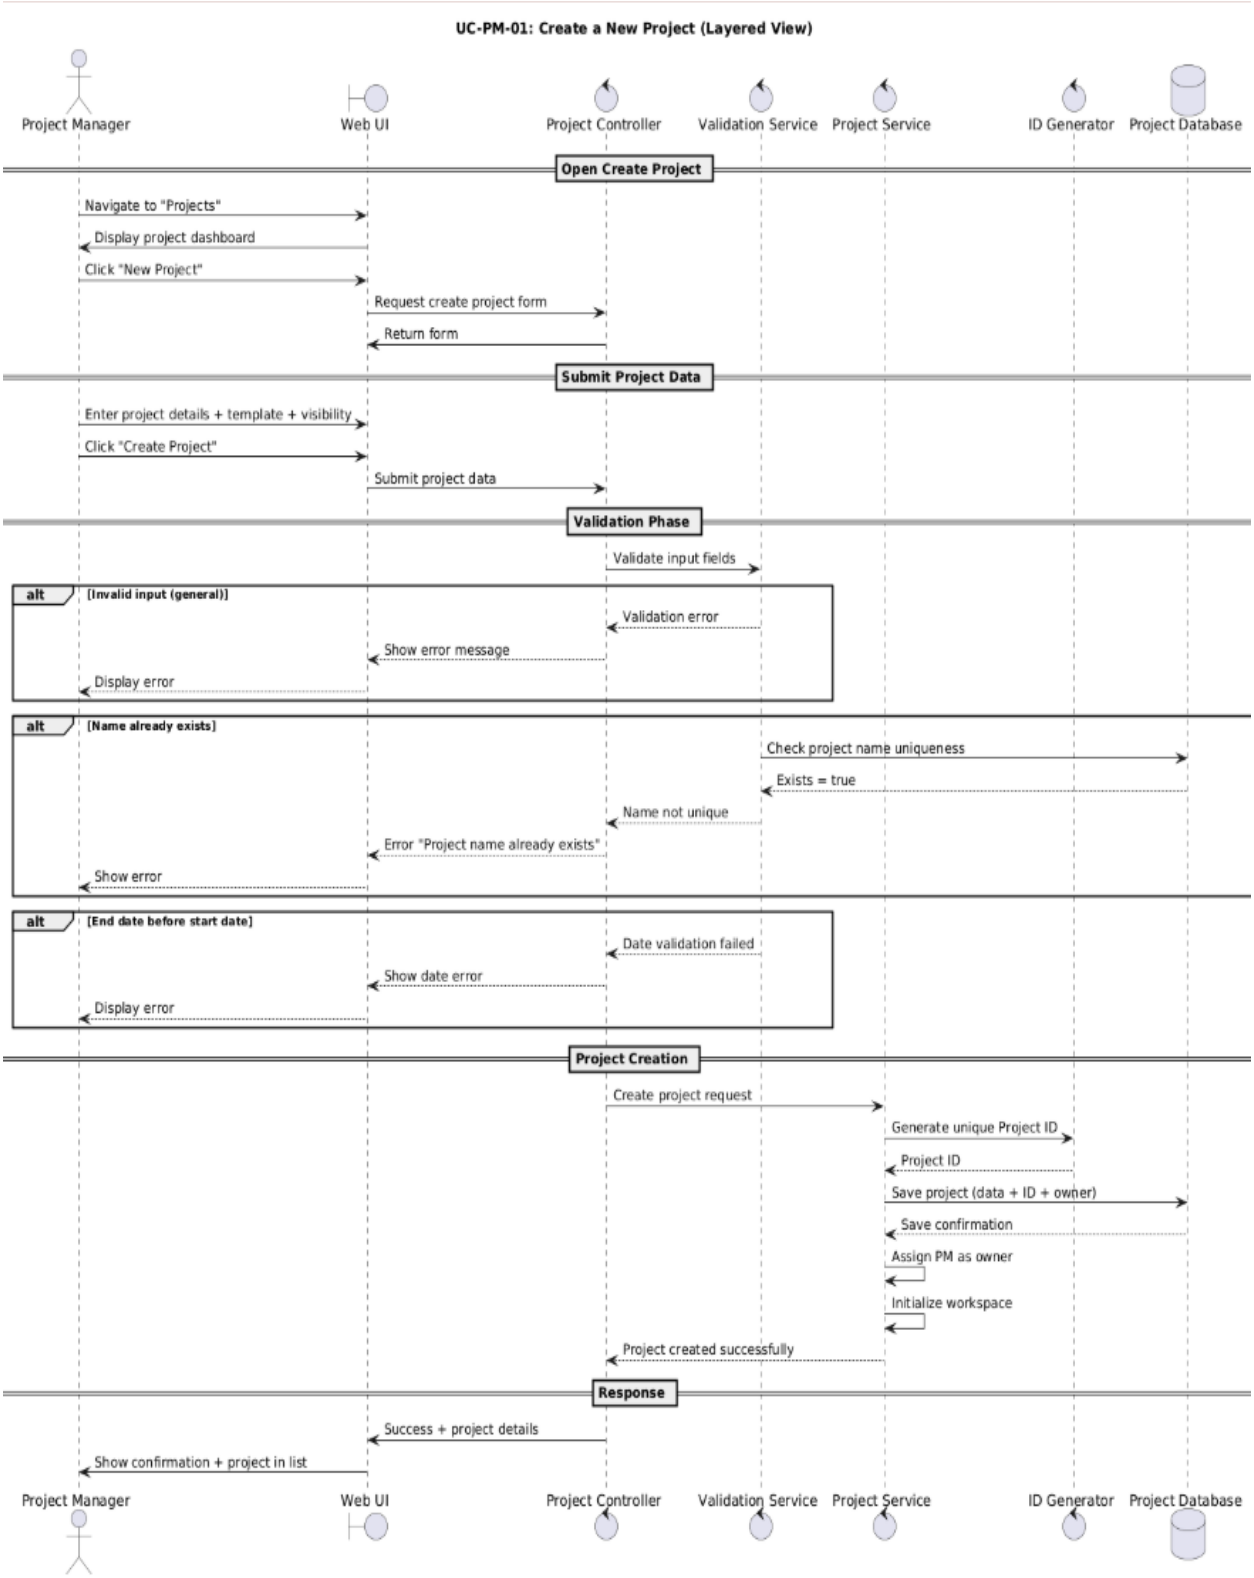
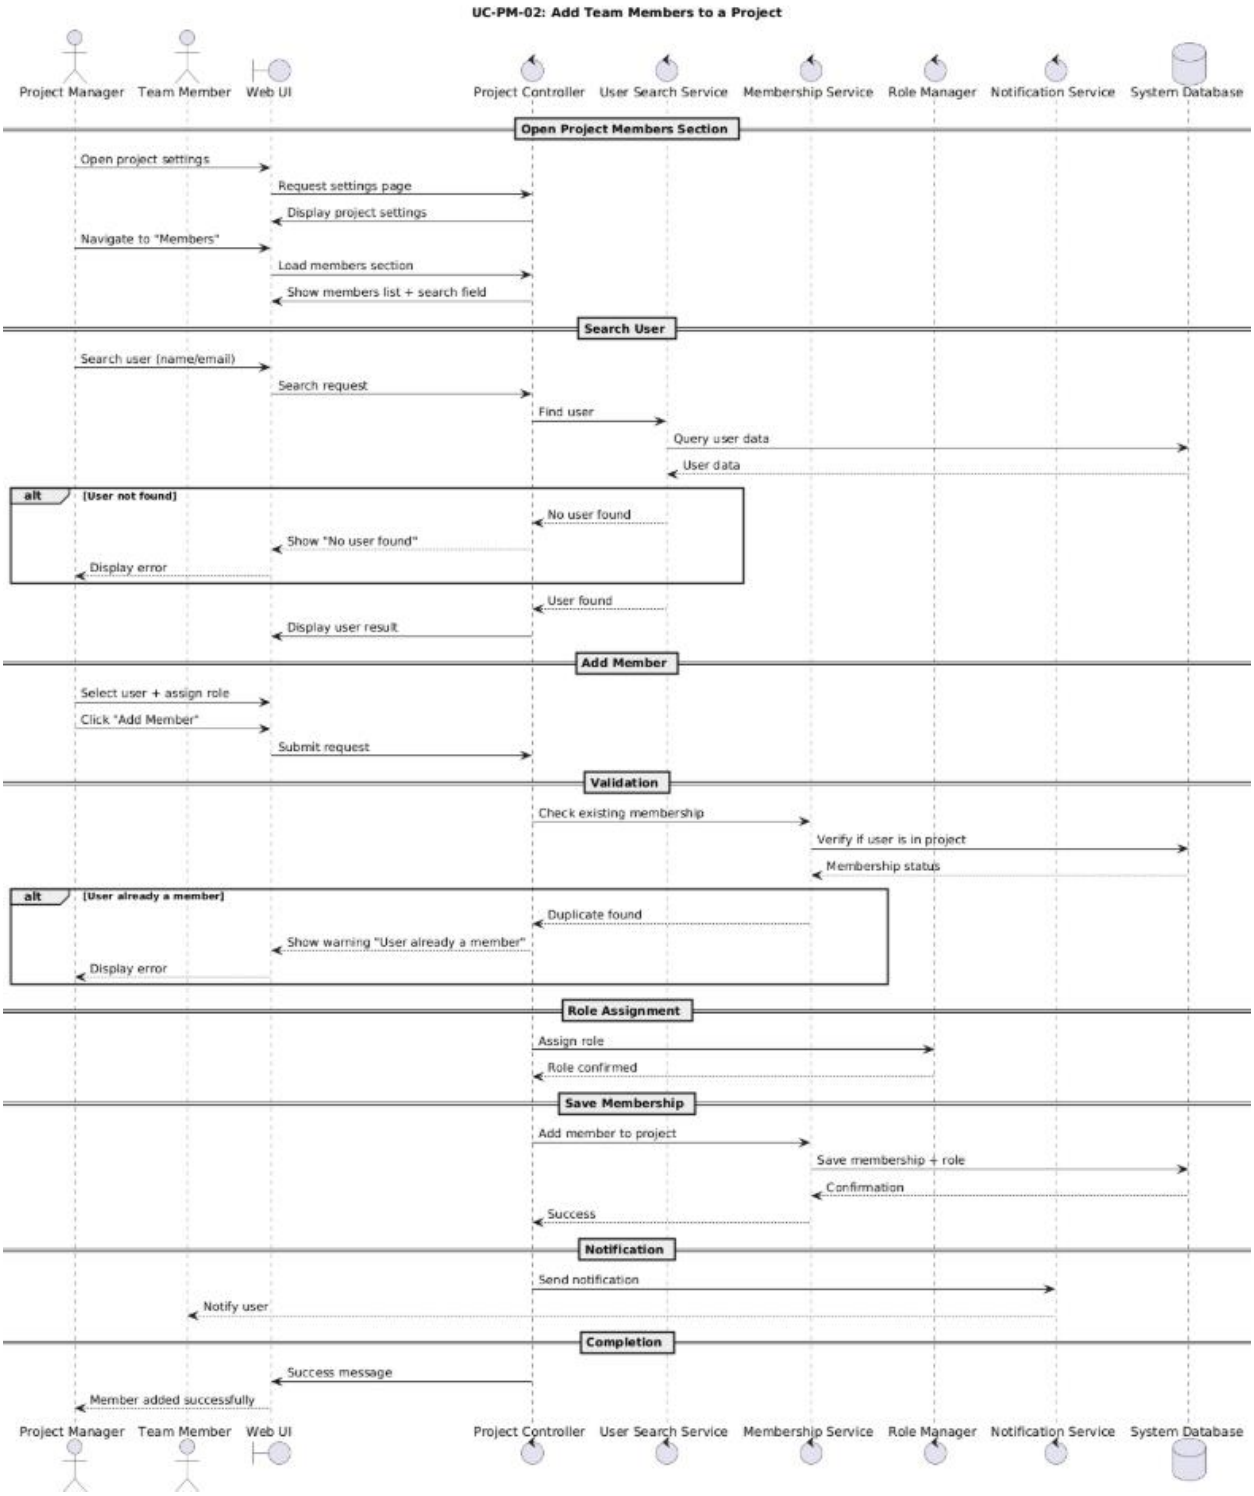
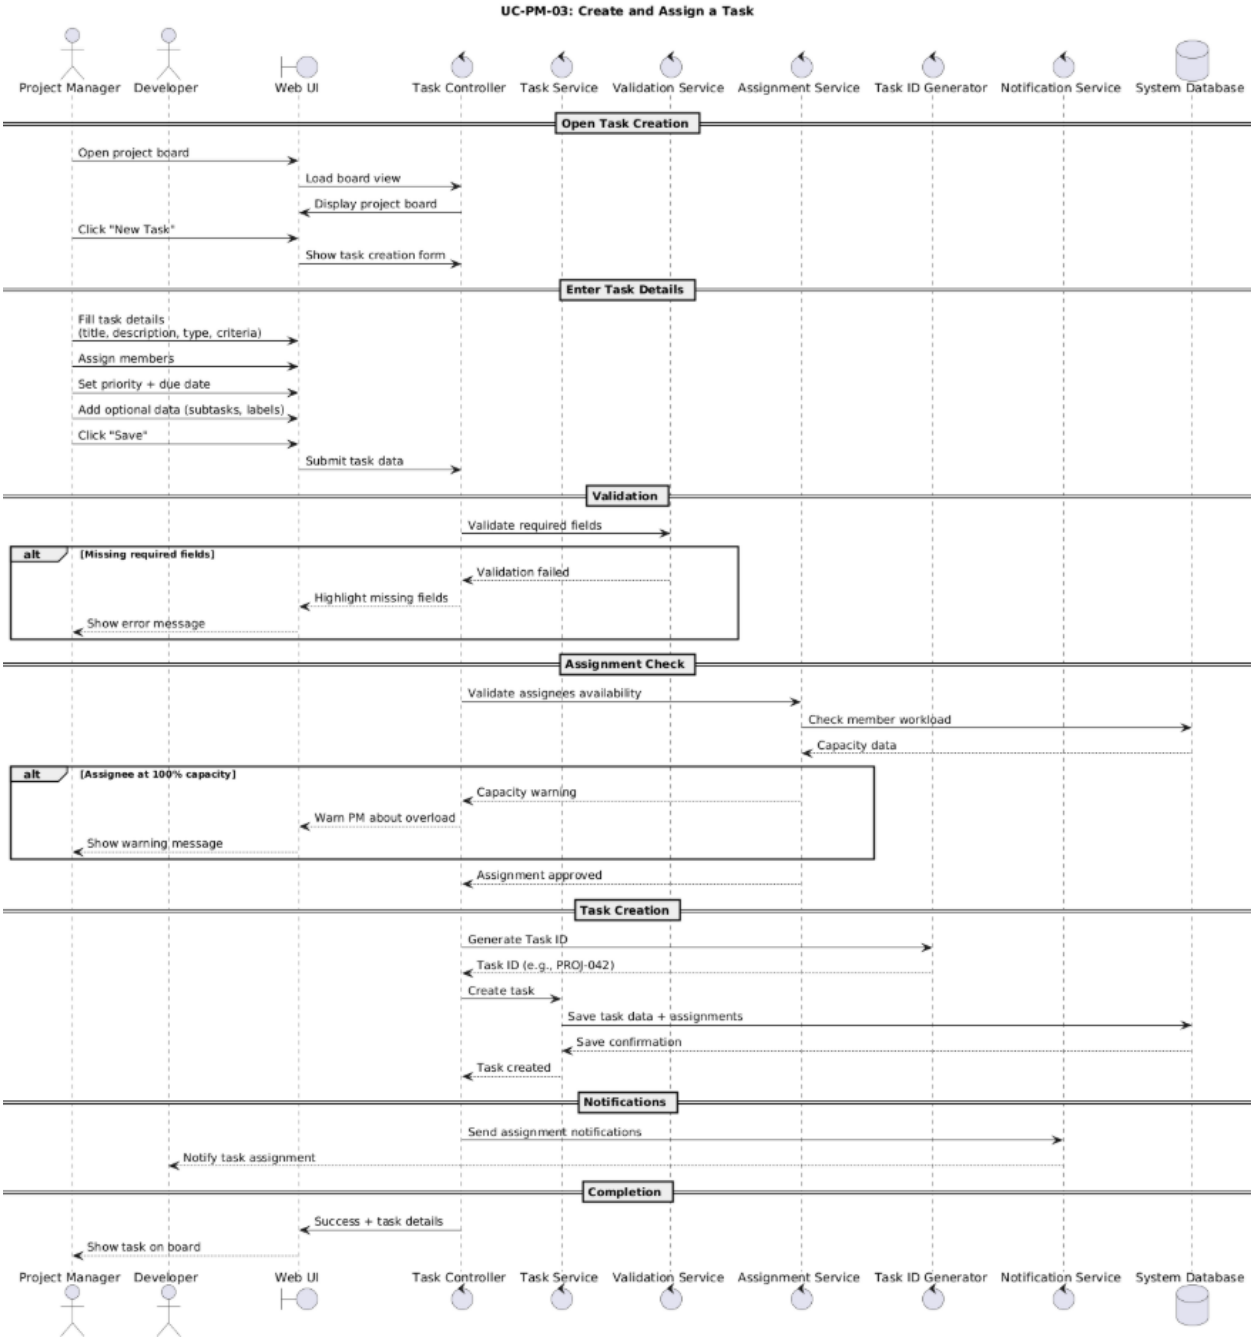
Project Manager – Edvin Mehaj

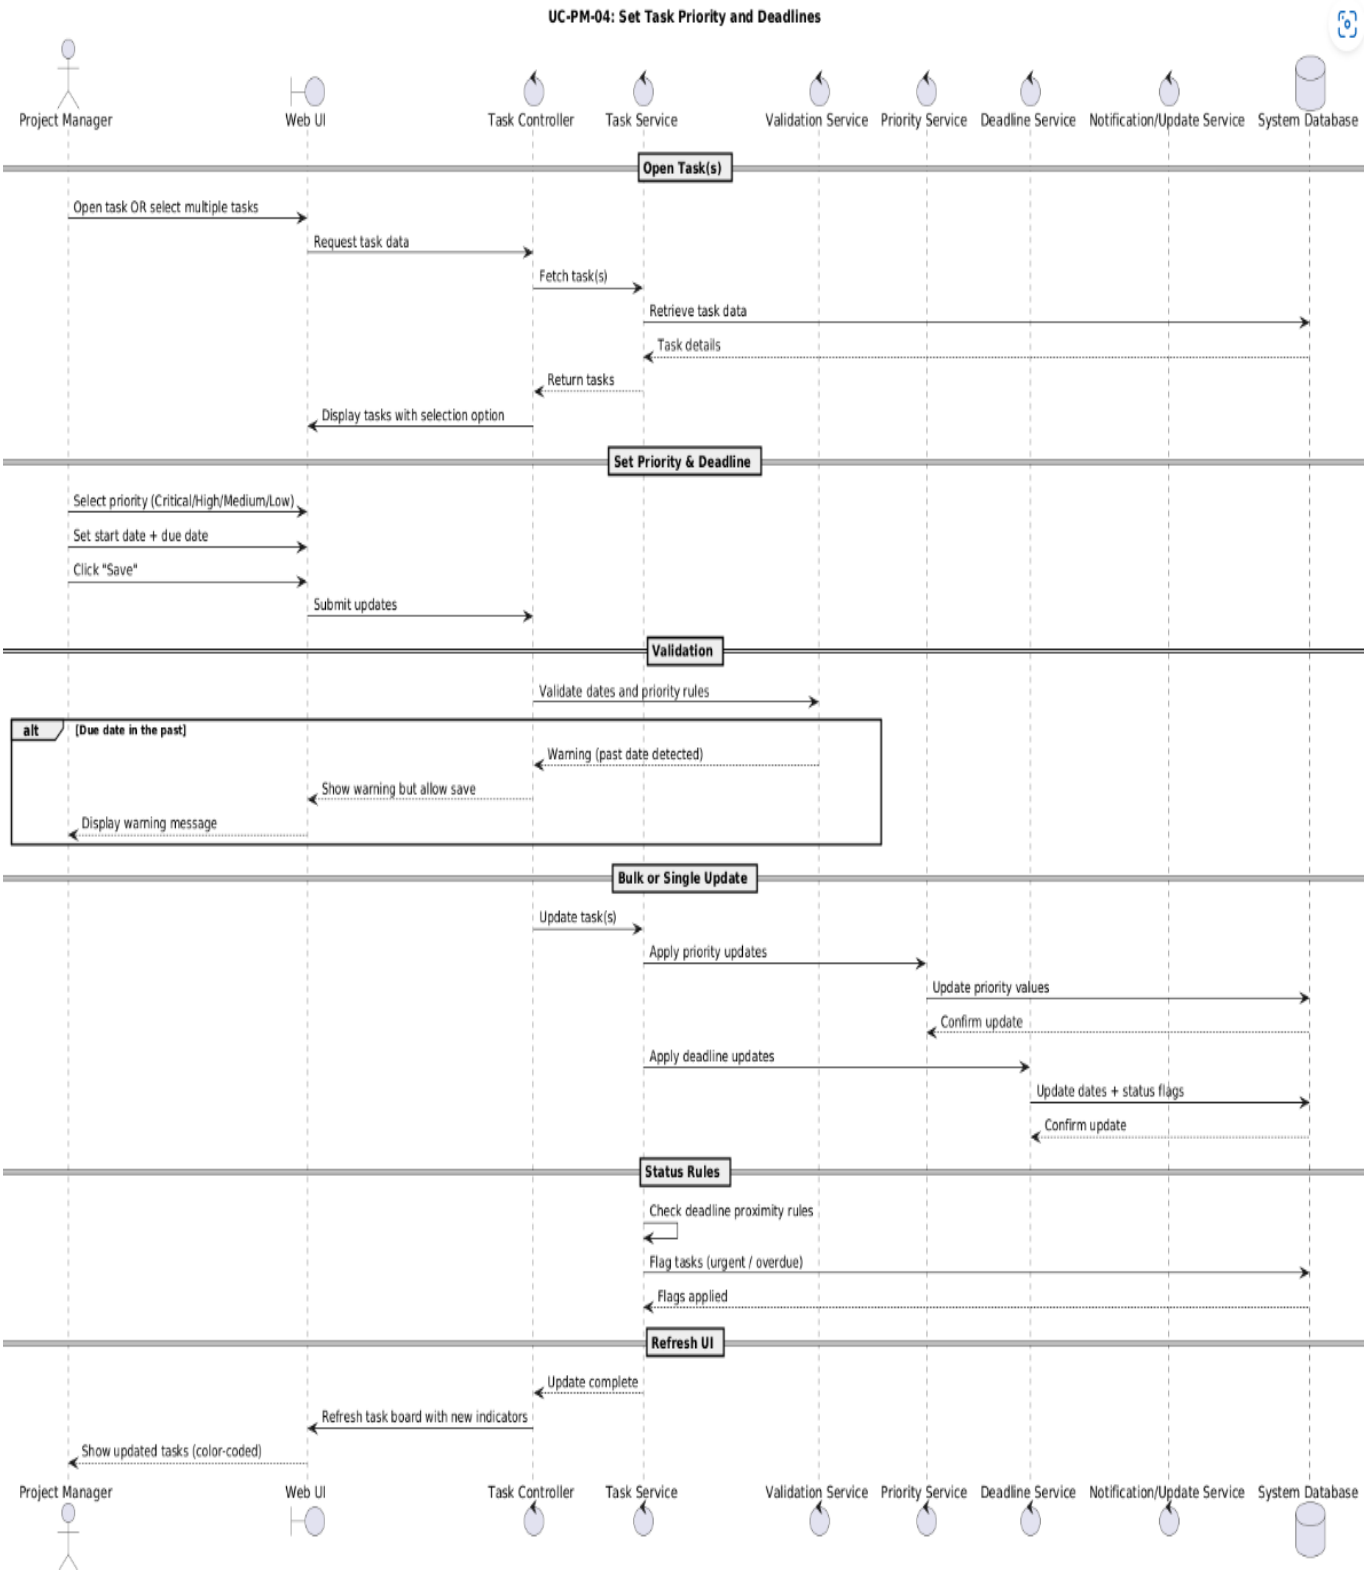




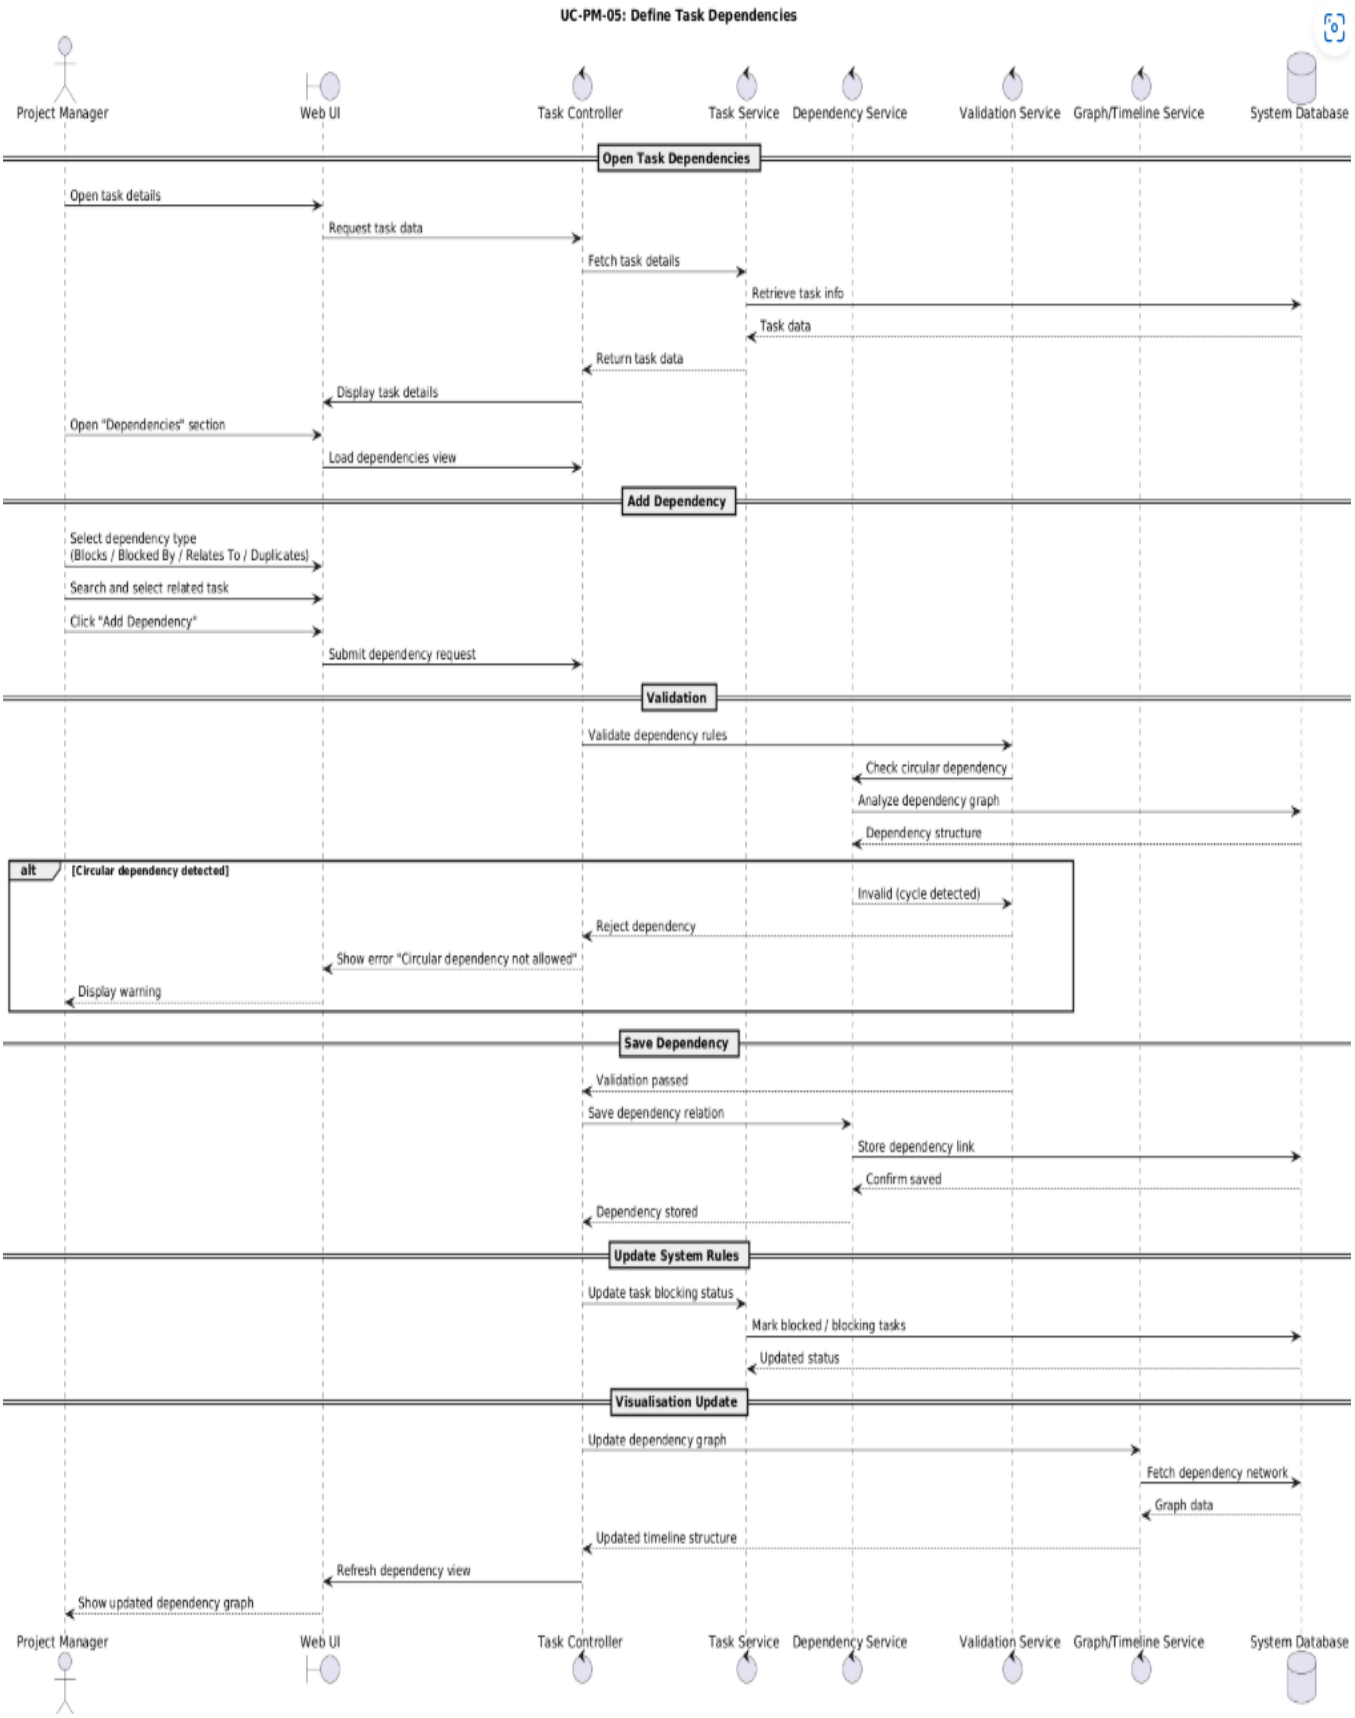
UC-PM-02: Add Team Members to a Project
Project Manager
Team Member
Web UI
Project Controller
User Search Service
Membership Service
Role Manager
Notification Service
System Database
Open Project Members Section
Open project settings
Request settings page
Display project settings
Navigate to "Members"
Load members section
Show members list + search field
Search User
Search user (name/email)
Search request
Find user
Query user data
User data
alt
[User not found]
No user found
Show "No user found"
Display error
User found
Display user result
Add Member
Select user + assign role
Click "Add Member"
Submit request
Validation
Check existing membership
Verify if user is in project
Membership status
alt
[User already a member]
Duplicate found
Show warning "User already a member"
Display error
Role Assignment
Assign role
Role confirmed
Save Membership
Add member to project
Save membership + role
Confirmation
Success
Notification
Send notification
Notify user
Completion
Success message
Member added successfully



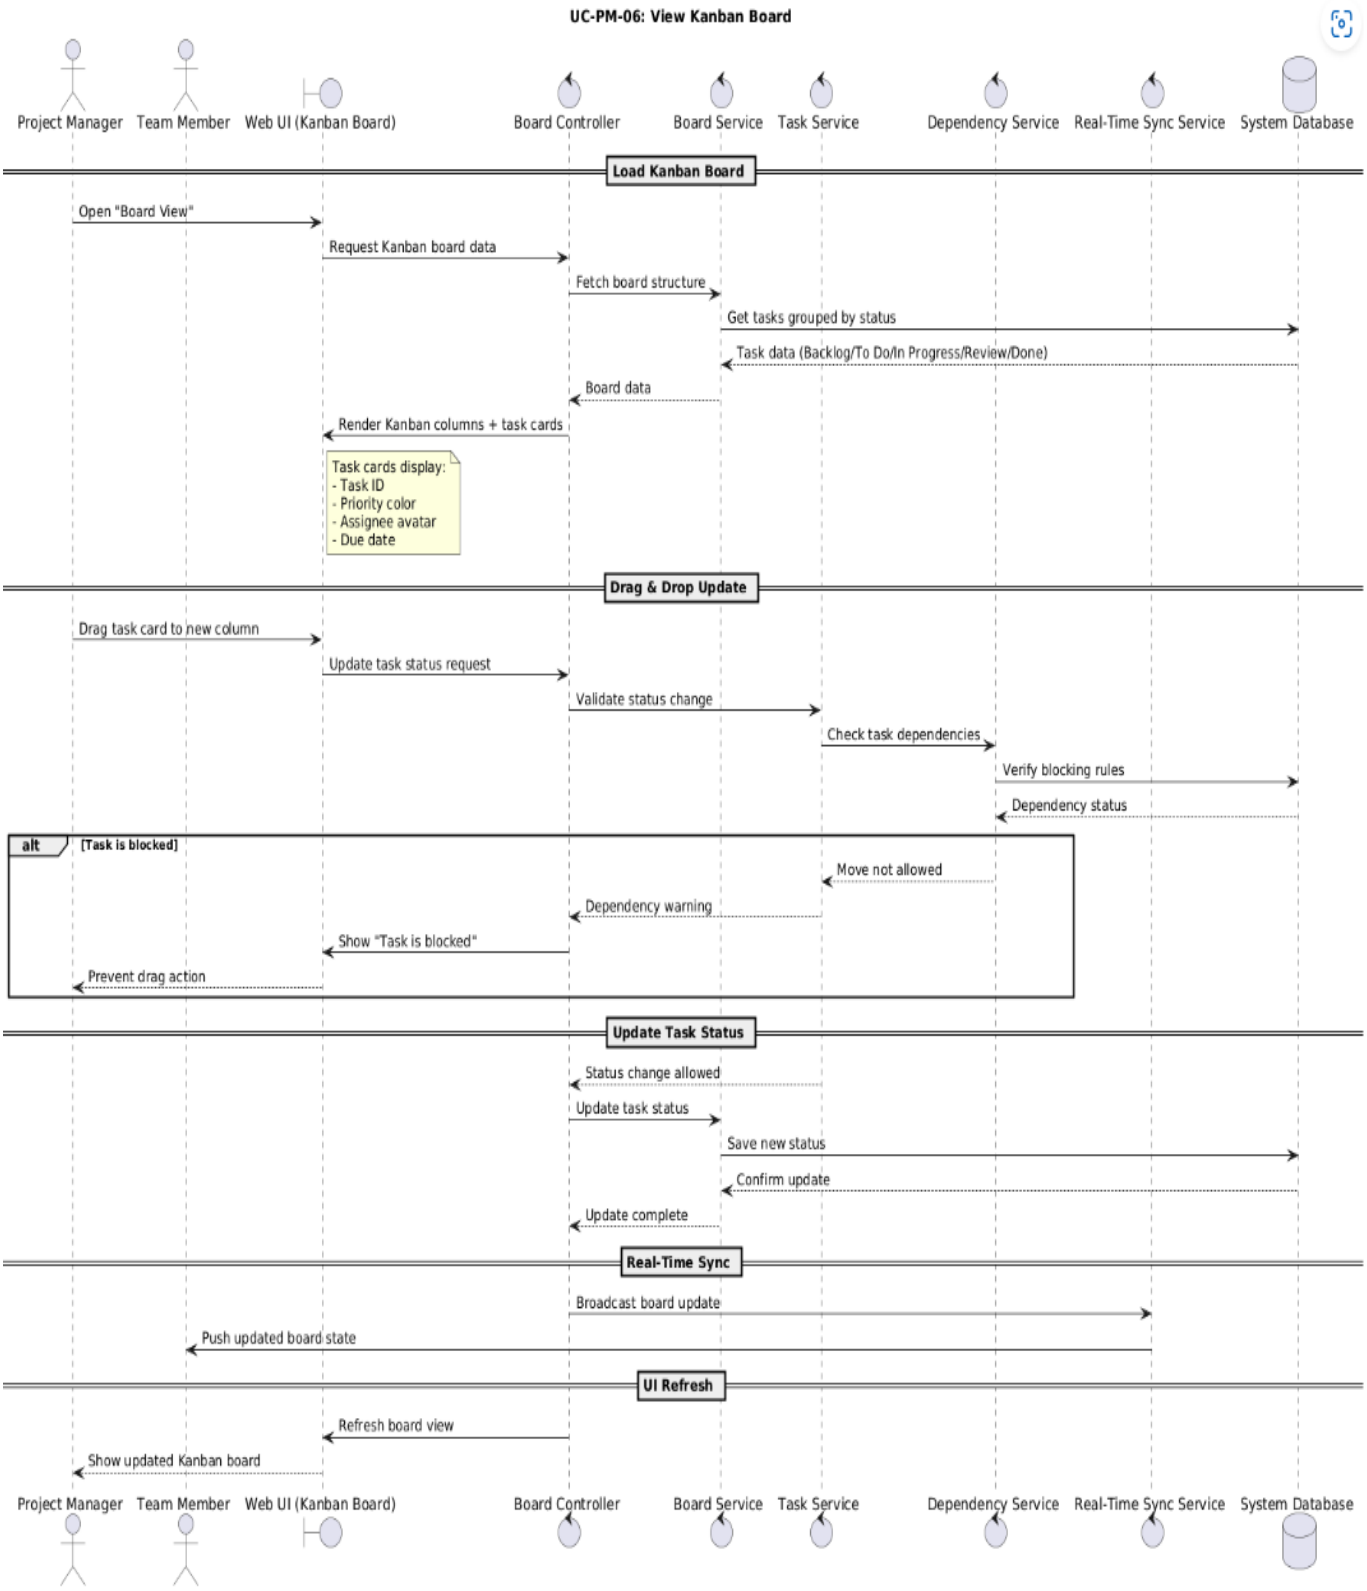
UC-PM-03: Create and Assign a Task
Project Manager
Developer
Web UI
Task Controller
Task Service
Validation Service
Assignment Service
Task ID Generator
Notification Service
System Database
Open Task Creation
Open project board
Load board view
Display project board
Click "New Task"
Show task creation form
Enter Task Details
Fill task details
(title, description, type, criteria)
Assign members
Set priority + due date
Add optional data (subtasks, labels)
Click "Save"
Submit task data
Validation
Validate required fields
alt
[Missing required fields]
Validation failed
Highlight missing fields
Show error message
Assignment Check
Validate assignees availability
Check member workload
Capacity data
alt
[Assignee at 100% capacity]
Capacity warning
Warn PM about overload
Show warning message
Assignment approved
Task Creation
Generate Task ID
Task ID (e.g., PROJ-042)
Create task
Save task data + assignments
Save confirmation
Task created
Notifications
Send assignment notifications
Notify task assignment
Completion
Success + task details
Show task on board



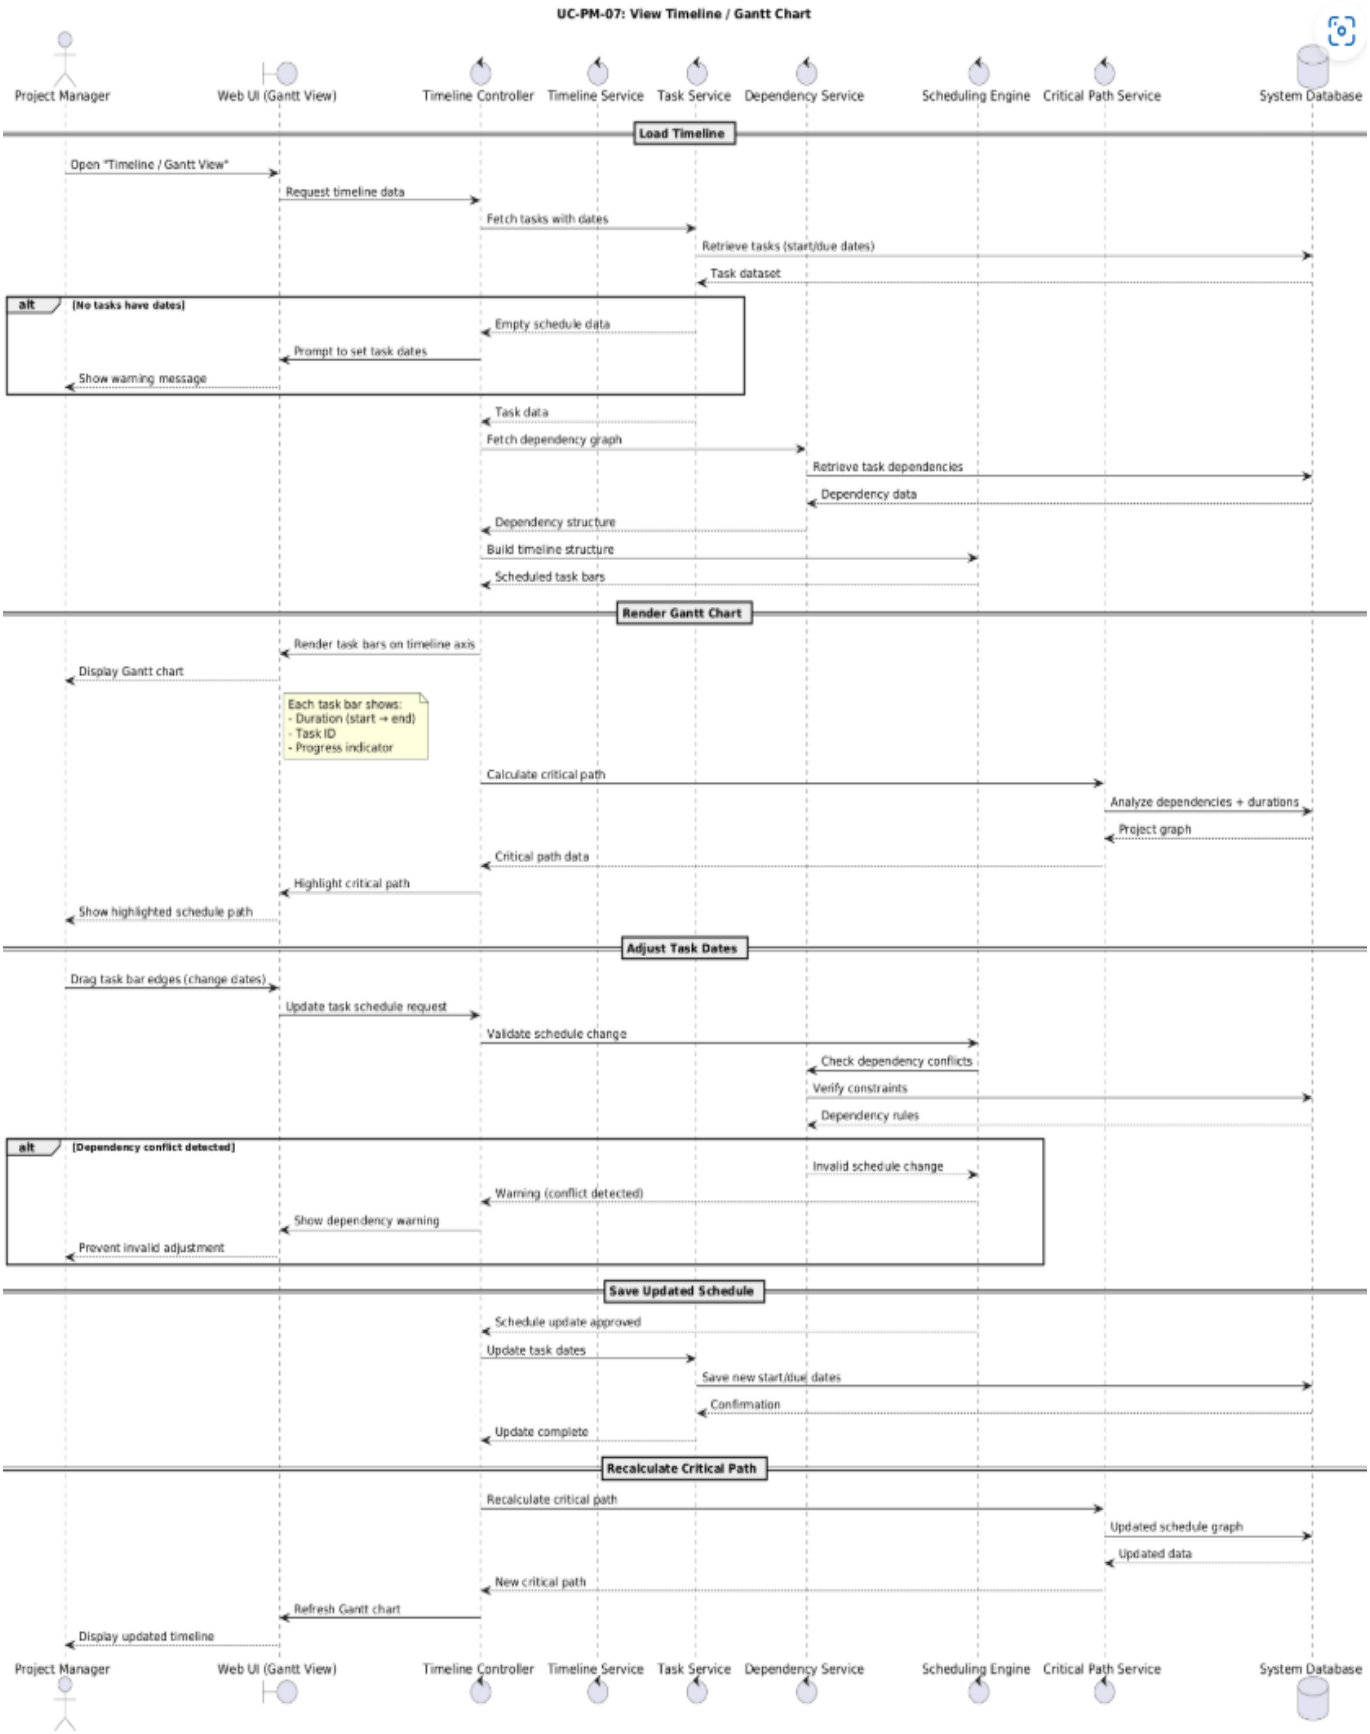
UC-PM-04: Set Task Priority and Deadlines
Project Manager
Web UI
Task Controller
Task Service
Validation Service
Priority Service
Deadline Service
Notification/Update Service
System Database
Open Task(s)
Open task OR select multiple tasks
Request task data
Fetch task(s)
Retrieve task data
Task details
Return tasks
Display tasks with selection option
Set Priority & Deadline
Select priority (Critical/High/Medium/Low)
Set start date + due date
Click "Save"
Submit updates
Validation
Validate dates and priority rules
alt
[Due date in the past]
Warning (past date detected)
Show warning but allow save
Display warning message
Bulk or Single Update
Update task(s)
Apply priority updates
Update priority values
Confirm update
Apply deadline updates
Update dates + status flags
Confirm update
Status Rules
Check deadline proximity rules
Flag tasks (urgent / overdue)
Flags applied
Refresh UI
Update complete
Refresh task board with new indicators
Show updated tasks (color-coded)



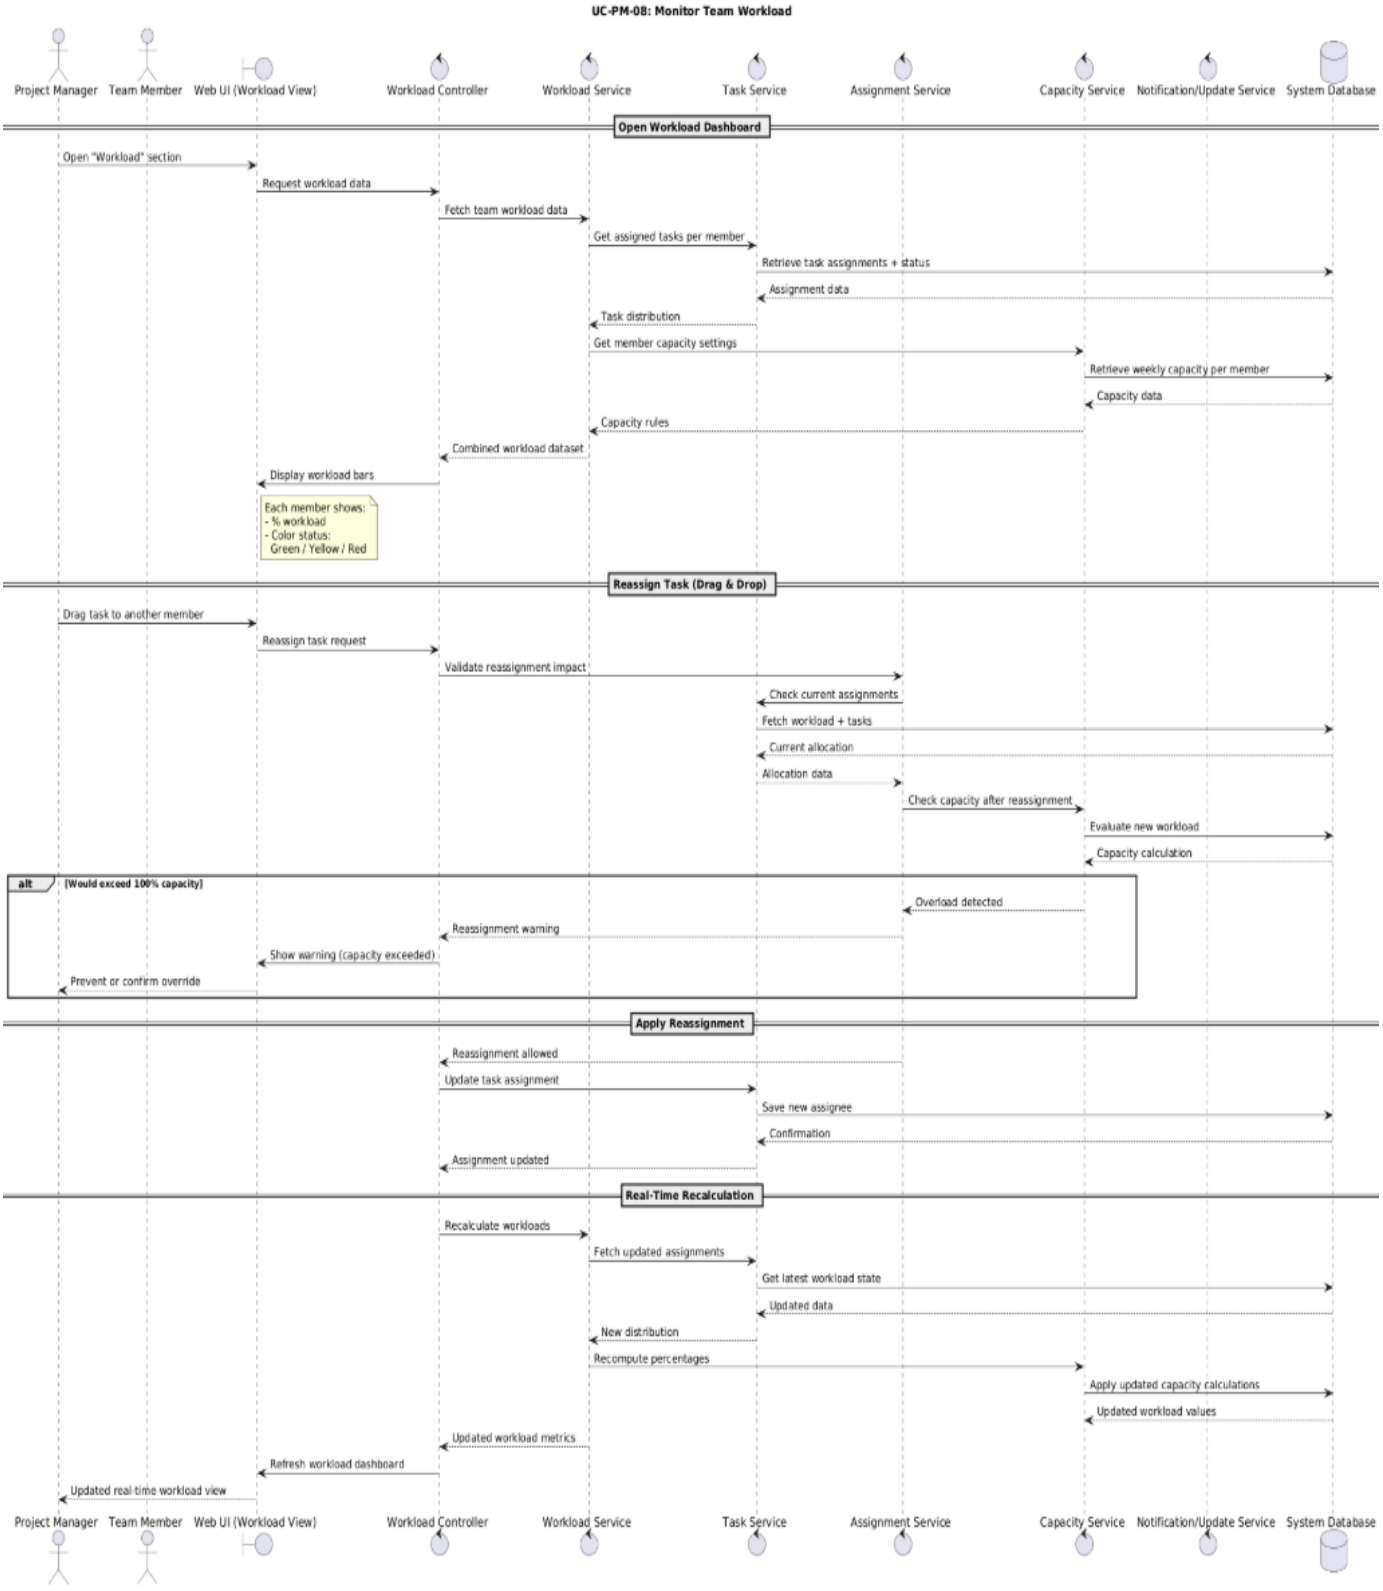
UC-PM-05: Define Task Dependencies
Project Manager
Web UI
Task Controller
Task Service
Dependency Service
Validation Service
Graph/Timeline Service
System Database
Open Task Dependencies
Open task details
Request task data
Fetch task details
Retrieve task info
Task data
Return task data
Display task details
Open "Dependencies" section
Load dependencies view
Add Dependency
Select dependency type
(Blocks / Blocked By / Relates To / Duplicates)
Search and select related task
Click "Add Dependency"
Submit dependency request
Validation
Validate dependency rules
Check circular dependency
Analyze dependency graph
Dependency structure
alt
[Circular dependency detected]
Invalid (cycle detected)
Reject dependency
Show error "Circular dependency not allowed"
Display warning
Save Dependency
Validation passed
Save dependency relation
Store dependency link
Confirm saved
Dependency stored
Update System Rules
Update task blocking status
Mark blocked / blocking tasks
Updated status
Visualisation Update
Update dependency graph
Fetch dependency network
Graph data
Updated timeline structure
Refresh dependency view
Show updated dependency graph



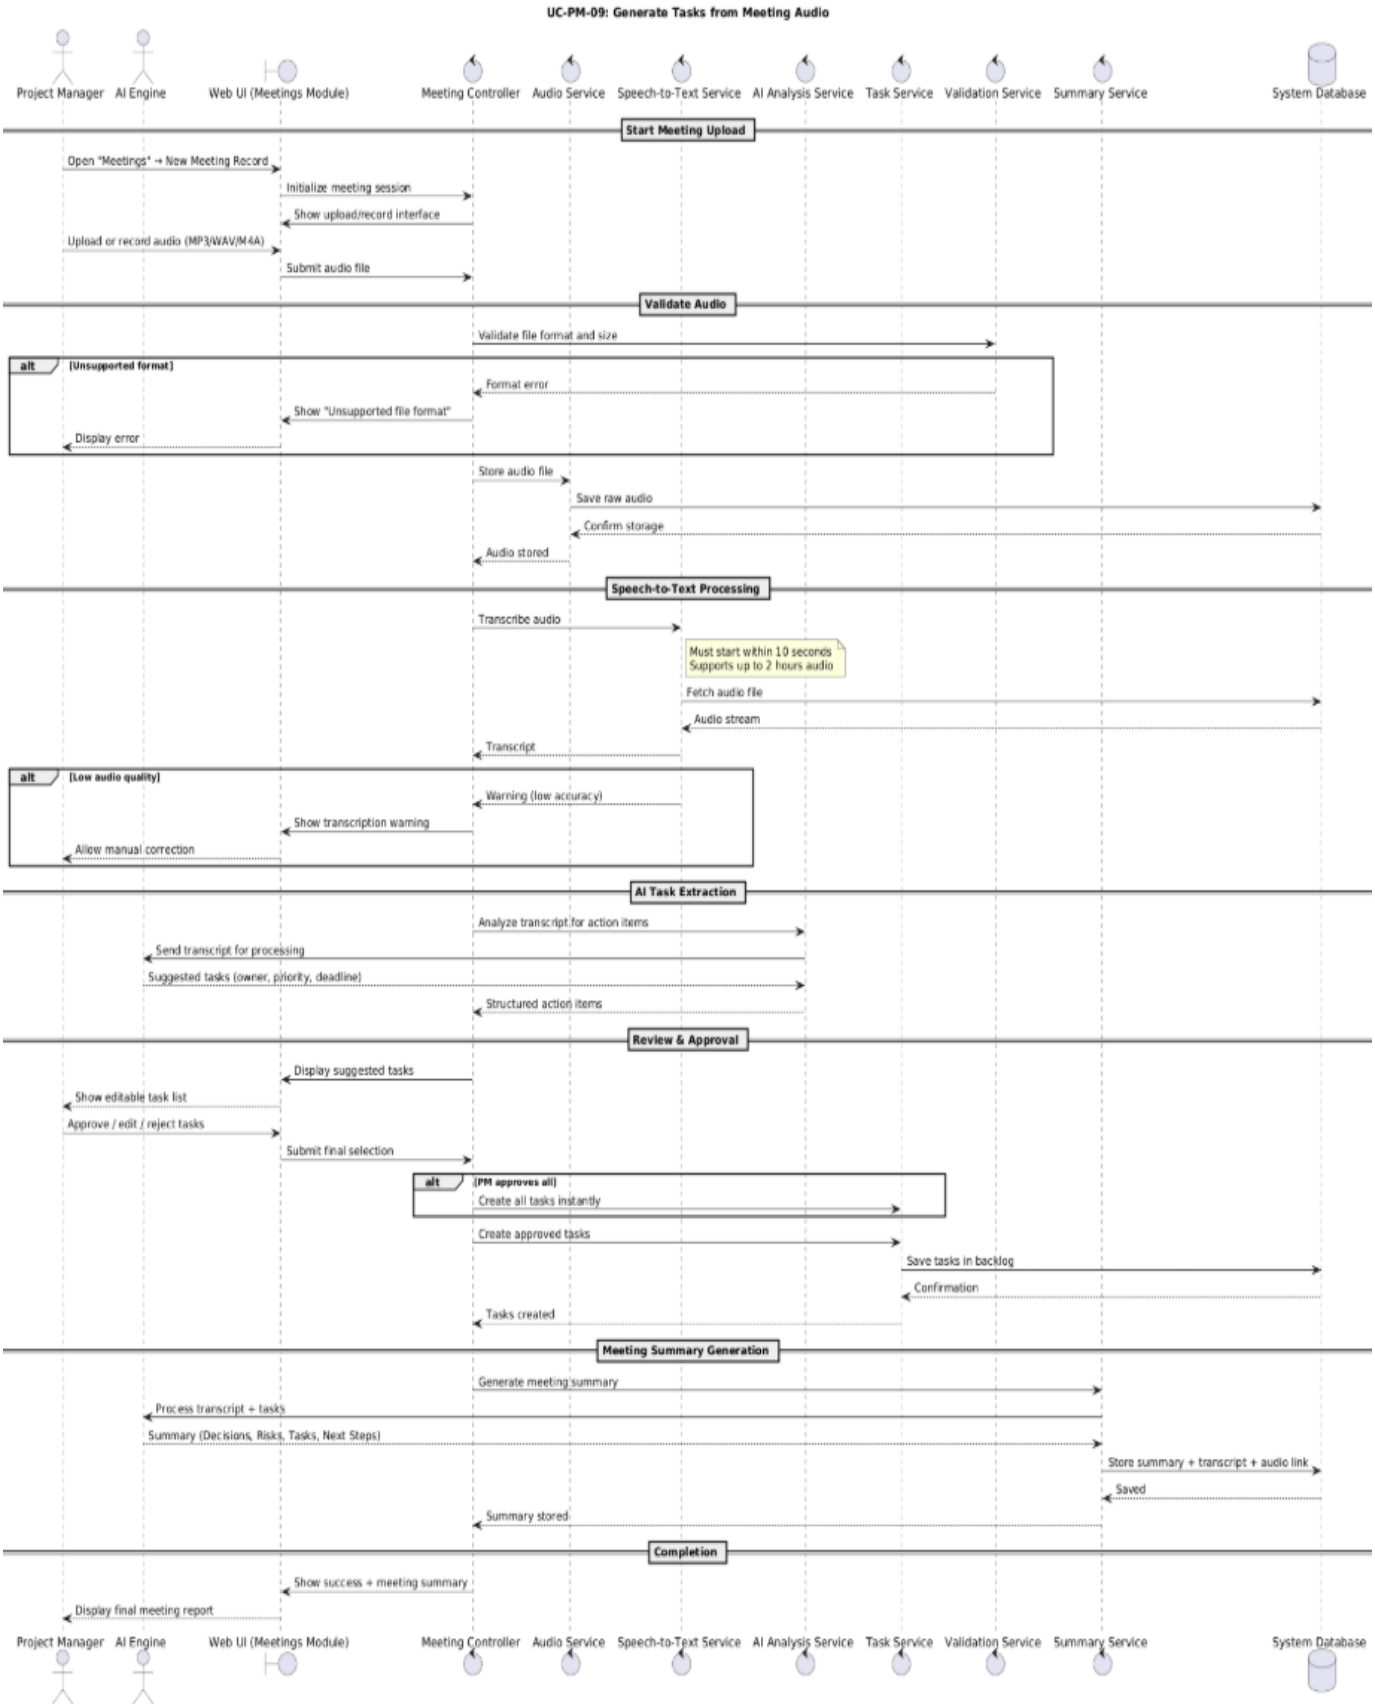
UC-PM-06: View Kanban Board
Project Manager
Team Member
Web UI (Kanban Board)
Board Controller
Board Service
Task Service
Dependency Service
Real-Time Sync Service
System Database
Load Kanban Board
Open "Board View"
Request Kanban board data
Fetch board structure
Get tasks grouped by status
Task data (Backlog/To Do/In Progress/Review/Done)
Board data
Render Kanban columns + task cards
Task cards display:
- Task ID
- Priority color
- Assignee avatar
- Due date
Drag & Drop Update
Drag task card to new column
Update task status request
Validate status change
Check task dependencies
Verify blocking rules
Dependency status
alt
[Task is blocked]
Move not allowed
Dependency warning
Show "Task is blocked"
Prevent drag action
Update Task Status
Status change allowed
Update task status
Save new status
Confirm update
Update complete
Real-Time Sync
Broadcast board update
Push updated board state
UI Refresh
Refresh board view
Show updated Kanban board



UC-PM-07: View Timeline / Gantt Chart
Project Manager
Web UI (Gantt View)
Timeline Controller
Timeline Service
Task Service
Dependency Service
Scheduling Engine
Critical Path Service
System Database
Load Timeline
Open "Timeline / Gantt View"
Request timeline data
Fetch tasks with dates
Retrieve tasks (start/due dates)
Task dataset
alt
[No tasks have dates]
Empty schedule data
Prompt to set task dates
Show warning message
Task data
Fetch dependency graph
Retrieve task dependencies
Dependency data
Dependency structure
Build timeline structure
Scheduled task bars
Render Gantt Chart
Render task bars on timeline axis
Display Gantt chart
Each task bar shows:
- Duration (start → end)
- Task ID
- Progress indicator
Calculate critical path
Analyze dependencies + durations
Project graph
Critical path data
Highlight critical path
Show highlighted schedule path
Adjust Task Dates
Drag task bar edges (change dates)
Update task schedule request
Validate schedule change
Check dependency conflicts
Verify constraints
Dependency rules
alt
[Dependency conflict detected]
Invalid schedule change
Warning (conflict detected)
Show dependency warning
Prevent invalid adjustment
Save Updated Schedule
Schedule update approved
Update task dates
Save new start/due dates
Confirmation
Update complete
Recalculate Critical Path
Recalculate critical path
Updated schedule graph
Updated data
New critical path
Refresh Gantt chart
Display updated timeline
Project Manager
Web UI (Gantt View)
Timeline Controller
Timeline Service
Task Service
Dependency Service
Scheduling Engine
Critical Path Service
System Database

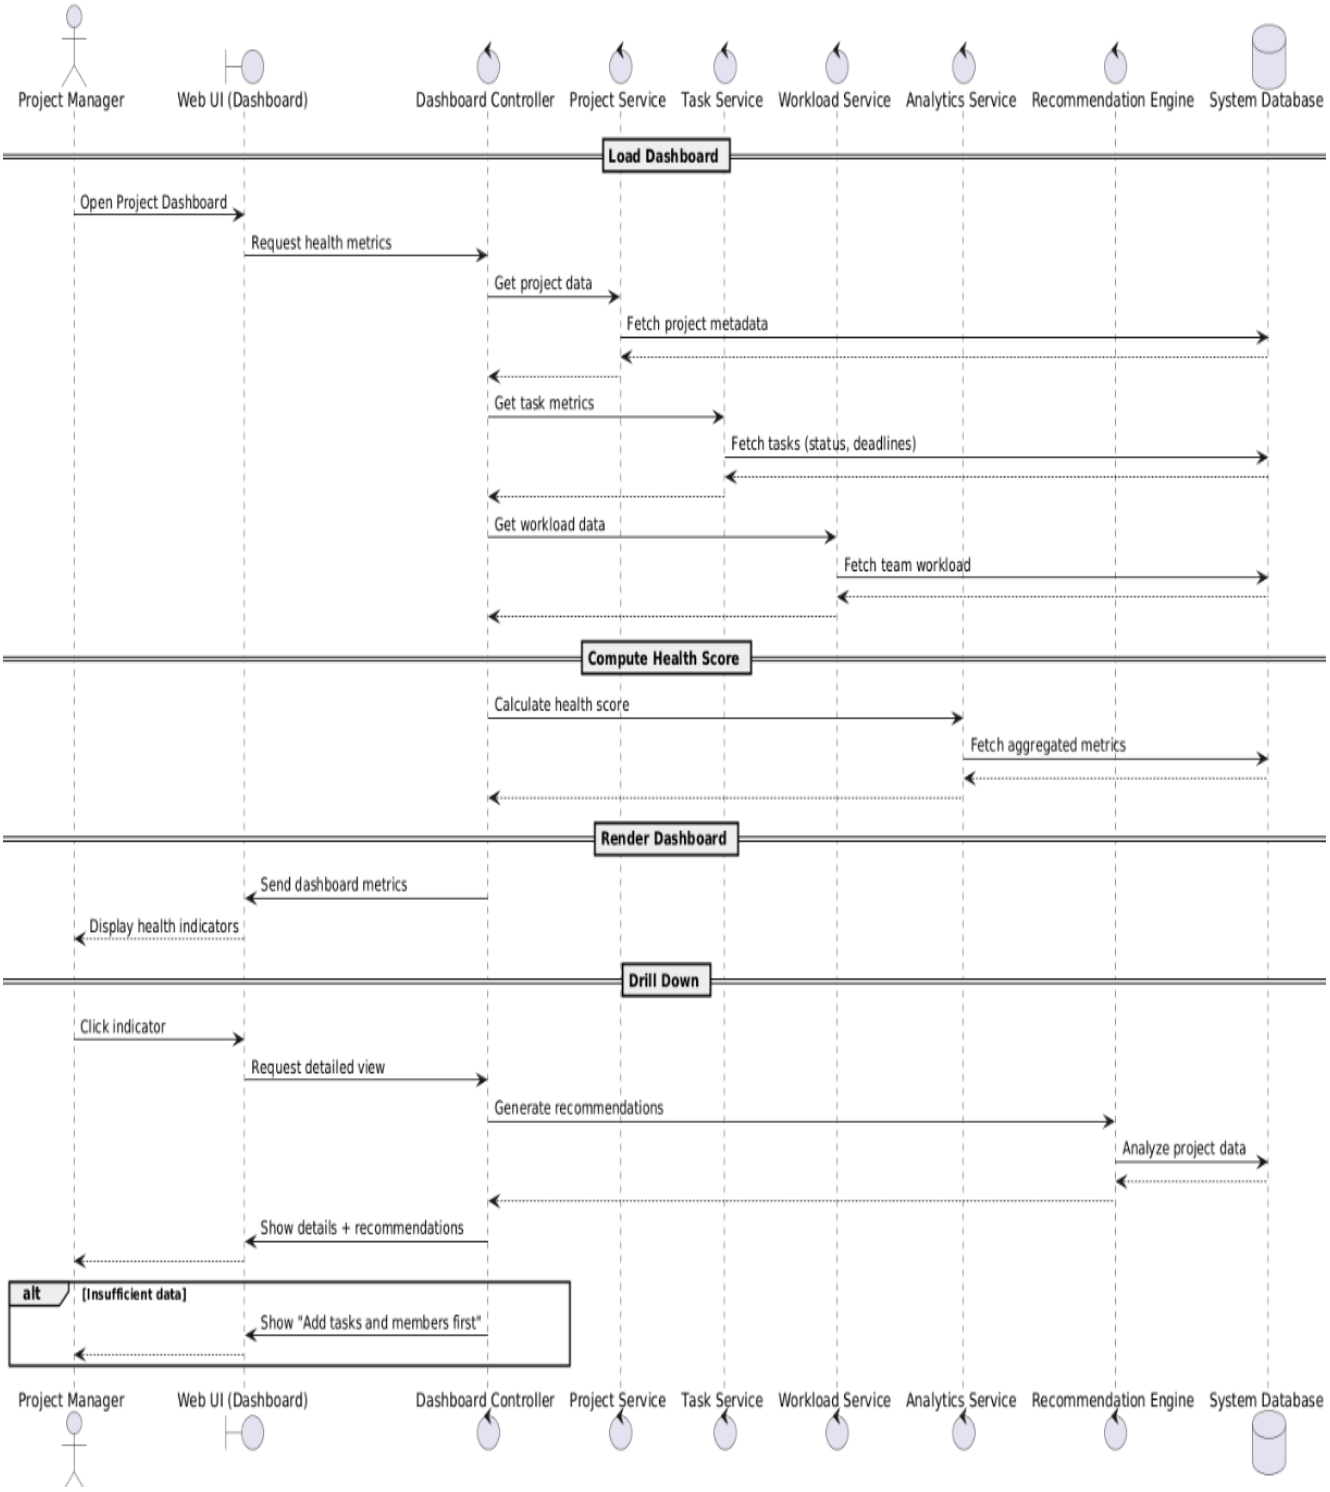


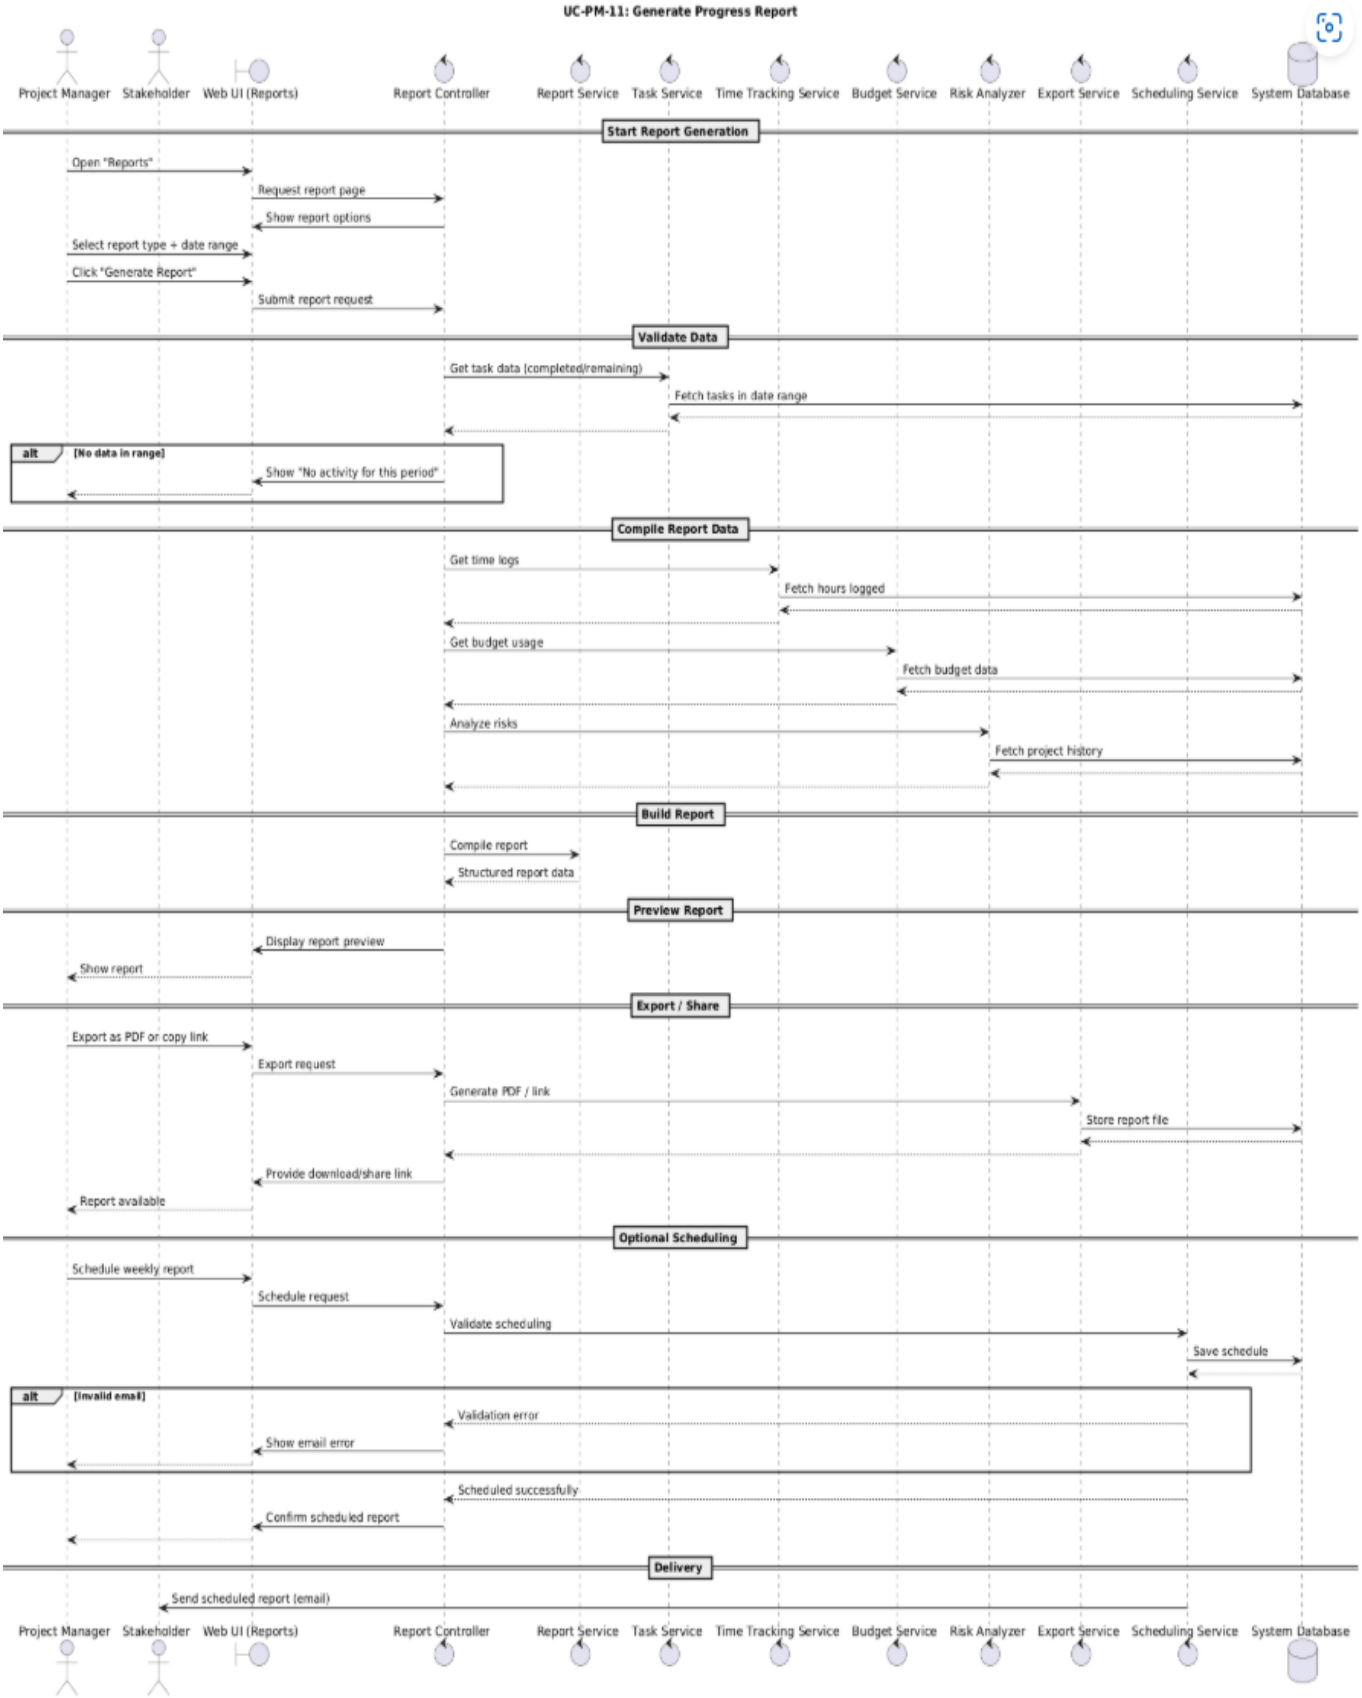
UC-PM-08: Monitor Team Workload
Project Manager
Team Member
Web UI (Workload View)
Workload Controller
Workload Service
Task Service
Assignment Service
Capacity Service
Notification/Update Service
System Database
Open Workload Dashboard
Open "Workload" section
Request workload data
Fetch team workload data
Get assigned tasks per member
Retrieve task assignments + status
Assignment data
Task distribution
Get member capacity settings
Retrieve weekly capacity per member
Capacity data
Capacity rules
Combined workload dataset
Display workload bars
Each member shows:
- % workload
- Color status:
Green / Yellow / Red
Reassign Task (Drag & Drop)
Drag task to another member
Reassign task request
Validate reassignment impact
Check current assignments
Fetch workload + tasks
Current allocation
Allocation data
Check capacity after reassignment
Evaluate new workload
Capacity calculation
alt
[Would exceed 100% capacity]
Overload detected
Reassignment warning
Show warning (capacity exceeded)
Prevent or confirm override
Apply Reassignment
Reassignment allowed
Update task assignment
Save new assignee
Confirmation
Assignment updated
Real-Time Recalculation
Recalculate workloads
Fetch updated assignments
Get latest workload state
Updated data
New distribution
Recompute percentages
Apply updated capacity calculations
Updated workload values
Updated workload metrics
Refresh workload dashboard
Updated real-time workload view



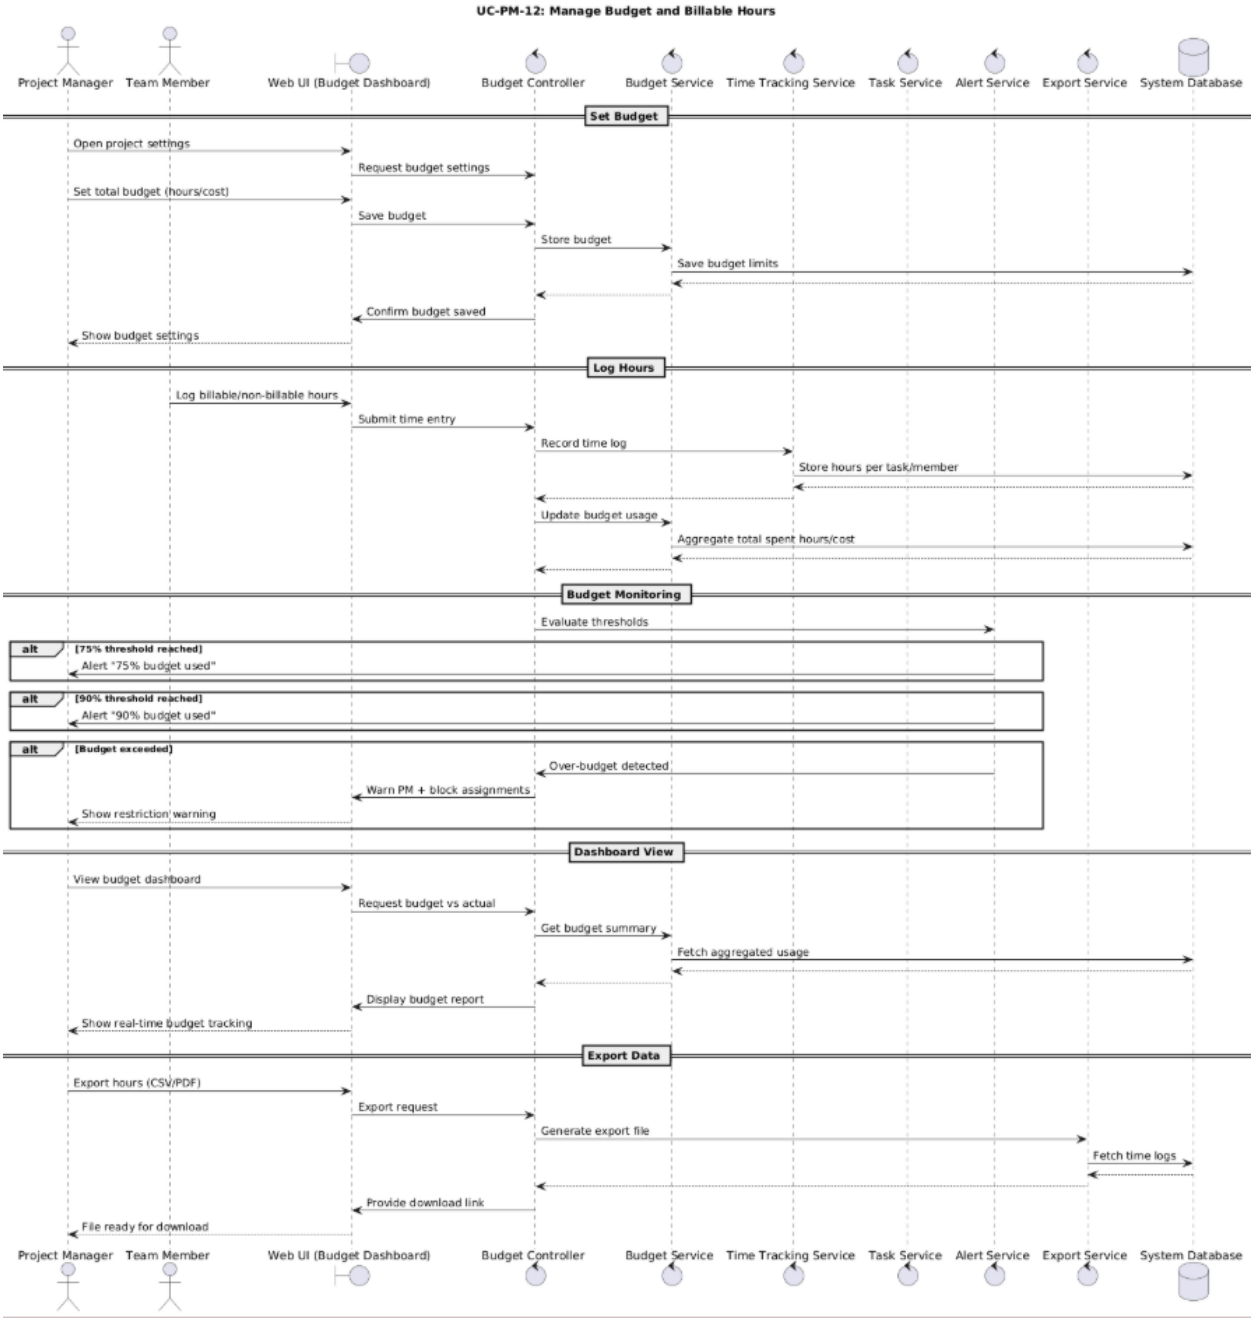
UC-PM-09: Generate Tasks from Meeting Audio
Project Manager
AI Engine
Web UI (Meetings Module)
Meeting Controller
Audio Service
Speech-to-Text Service
AI Analysis Service
Task Service
Validation Service
Summary Service
System Database
Start Meeting Upload
Open "Meetings" → New Meeting Record
Initialize meeting session
Show upload/record interface
Upload or record audio (MP3/WAV/M4A)
Submit audio file
Validate Audio
Validate file format and size
alt
[Unsupported format]
Format error
Show "Unsupported file format"
Display error
Store audio file
Save raw audio
Confirm storage
Audio stored
Speech-to-Text Processing
Transcribe audio
Must start within 10 seconds
Supports up to 2 hours audio
Fetch audio file
Audio stream
Transcript
alt
[Low audio quality]
Warning (low accuracy)
Show transcription warning
Allow manual correction
AI Task Extraction
Analyze transcript for action items
Send transcript for processing
Suggested tasks (owner, priority, deadline)
Structured action items
Review & Approval
Display suggested tasks
Show editable task list
Approve / edit / reject tasks
Submit final selection
alt
[PM approves all]
Create all tasks instantly
Create approved tasks
Save tasks in backlog
Confirmation
Tasks created
Meeting Summary Generation
Generate meeting summary
Process transcript + tasks
Summary (Decisions, Risks, Tasks, Next Steps)
Store summary + transcript + audio link
Saved
Summary stored
Completion
Show success + meeting summary
Display final meeting report

UC-PM-10: View Project Health Dashboard

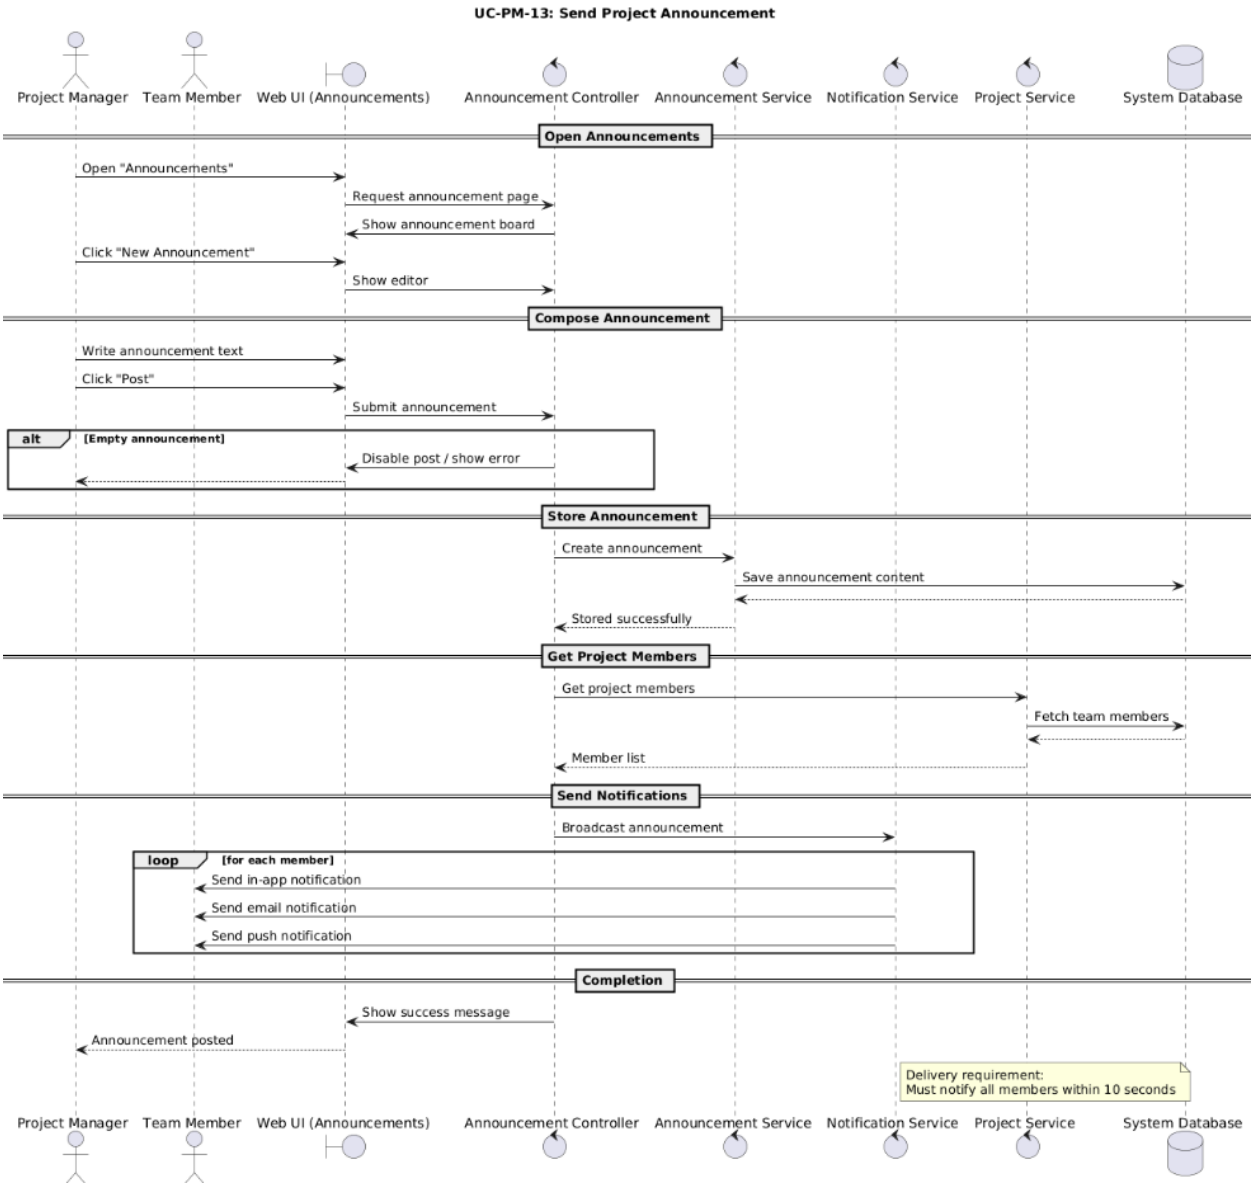




UC-PM-11: Generate Progress Report
Project Manager
Stakeholder
Web UI (Reports)
Report Controller
Report Service
Task Service
Time Tracking Service
Budget Service
Risk Analyzer
Export Service
Scheduling Service
System Database
Start Report Generation
Open "Reports"
Request report page
Show report options
Select report type + date range
Click "Generate Report"
Submit report request
Validate Data
Get task data (completed/remaining)
Fetch tasks in date range
alt
[No data in range]
Show "No activity for this period"
Compile Report Data
Get time logs
Fetch hours logged
Get budget usage
Fetch budget data
Analyze risks
Fetch project history
Build Report
Compile report
Structured report data
Preview Report
Display report preview
Show report
Export / Share
Export as PDF or copy link
Export request
Generate PDF / link
Store report file
Provide download/share link
Report available
Optional Scheduling
Schedule weekly report
Schedule request
Validate scheduling
Save schedule
alt
[Invalid email]
Validation error
Show email error
Scheduled successfully
Confirm scheduled report
Delivery
Send scheduled report (email)



UC-PM-12: Manage Budget and Billable Hours
Project Manager
Team Member
Web UI (Budget Dashboard)
Budget Controller
Budget Service
Time Tracking Service
Task Service
Alert Service
Export Service
System Database
Set Budget
Open project settings
Request budget settings
Set total budget (hours/cost)
Save budget
Store budget
Save budget limits
Confirm budget saved
Show budget settings
Log Hours
Log billable/non-billable hours
Submit time entry
Record time log
Store hours per task/member
Update budget usage
Aggregate total spent hours/cost
Budget Monitoring
Evaluate thresholds
alt
[75% threshold reached]
Alert "75% budget used"
alt
[90% threshold reached]
Alert "90% budget used"
alt
[Budget exceeded]
Over-budget detected
Warn PM + block assignments
Show restriction warning
Dashboard View
View budget dashboard
Request budget vs actual
Get budget summary
Fetch aggregated usage
Display budget report
Show real-time budget tracking
Export Data
Export hours (CSV/PDF)
Export request
Generate export file
Fetch time logs
Provide download link
File ready for download



UC-PM-13: Send Project Announcement
Project Manager
Team Member
Web UI (Announcements)
Announcement Controller
Announcement Service
Notification Service
Project Service
System Database
Open Announcements
Open "Announcements"
Request announcement page
Show announcement board
Click "New Announcement"
Show editor
Compose Announcement
Write announcement text
Click "Post"
Submit announcement
alt
[Empty announcement]
Disable post / show error
Store Announcement
Create announcement
Save announcement content
Stored successfully
Get Project Members
Get project members
Fetch team members
Member list
Send Notifications
Broadcast announcement
loop
[for each member]
Send in-app notification
Send email notification
Send push notification
Completion
Show success message
Announcement posted
Delivery requirement:
Must notify all members within 10 seconds
